

VMC Data Breach Report

March 5th, 2020

Process

Use www.haveibeenpwned.com to periodically look at every VMC employee's work email addresses to see if they have been part of any known data breaches. Check back every quarter to see if any changes (new data breaches) have been reported on those email addresses.

For the future, encourage employees to sign up for the site's data breach reporting feature (for both work and personal email accounts) so that they are actively notified of any new breaches in real time.

Executive Summary

Visit Mendocino County has been minimally impacted by external data breaches at this point in time. Two additional accounts experienced data breaches from last quarter (info@visitmendocino.com and tom@visitmendocino.com). It is interesting to note that the data breach affecting info@visitmendocino.com actually occurred in 2017 but was only made publicly available recently - this is often the case with data breaches. A total of four (4) user accounts (one of them no longer active) were involved in data breaches, and only the inactive account had passwords exposed. This is one of the best situations I have seen personally among non profits in Mendocino County.

Data Breaches

Name	Email	Breaches	Data Breach Name	Passwords?
Emily Saengarun	emily@visitmendocino.com	0	None	NO
Events VMC	events@visitmendocino.com	0	None	NO
Jennifer Seward	jennifer@visitmendocino.com	2	Data Enrichment Exposure From PDL Customer, Verifications.io	NO
